Summary

Senior Frontend Developer with 9+ years of experience, specializing in Vue 3, TypeScript, and JavaScript. Built shared UI libraries and micro-frontends for a multi-product FinTech platform and migrated Vue 2 applications to Vue 3. Hands-on Node.js and API integration experience.

Core Skills

- Frontend: Vue.js (Vue 2/3), React, TypeScript, JavaScript, Astro, jQuery, HTML, CSS, SCSS
- Vue ecosystem: Composition API, Vue Router, Pinia, Vuex, Vuetify, Quasar, PrimeVue
- Architecture: Micro-frontends, Module Federation, shared UI libraries, npm packages
- Unit and E2E testing: Vitest, Jest, Cypress, Playwright
- UI: responsive design, accessibility, i18n, performance optimization, Core Web Vitals
- Backend: Node.js, Express, Strapi, REST APIs, SSO, SSE, MQTT, PHP, WordPress
- Tooling and delivery: Vite, Webpack, Gulp, Git, Docker, Argo CD, CI/CD
- AI: Claude Code, Cursor, Codex, LLM integration, MCP, agentic workflows, OpenAI API
- Design and collaboration: Storybook, Figma, code review

Languages

English – B2 (Upper-intermediate) | Ukrainian and Russian – native

Work Experience

Freelance Web Developer (part-time), Confidential software development company
Sep 2026 – Present

- Rebuilding an EdTech company's WordPress website with custom React-based Gutenberg blocks, custom post types and taxonomies, using an AI-assisted development workflow.

Senior Frontend Developer, Zeal Holdings Limited
Dec 2024 – Aug 2026

FinTech platform with multiple products used by traders, partners, and internal teams.

- Built reusable UI components for a shared library used by 20+ engineers across 4-5 teams and 6 frontend modules; updated components and interfaces for a global rebranding.
- Built end-to-end features using Vue 3, TypeScript, Pinia and Vuetify, including onboarding missions, marketing campaigns, an economic calendar and a marketing asset portal.
- Contributed to splitting the frontend into independent modules using Vite Module Federation and developed new modules within this architecture.
- Migrated applications and shared components from Vue 2 to Vue 3, upgraded dependencies, added Playwright E2E tests, and improved Vitest coverage.
- Managed releases and collaborated with SRE and DevOps to resolve build, deployment, and security issues and help address major production incidents.
- Built a Node.js/Express SSO adapter that verified JWTs, securely requested login links from an existing backend, and validated redirect URLs.
- Migrated a WordPress website to Astro, improving its PageSpeed score from ~30 to 90.

Senior Vue.js Frontend Developer, mySupply
Nov 2023 – Dec 2024
AI-powered procurement platform developed by a German startup.

- Served as the main developer of the AI Buying Agent, taking an existing proof of concept to a production-ready product. Built its frontend with Vue.js and Quasar and its backend with Node.js/Express, integrating the OpenAI API and internal procurement REST APIs.
- Developed and maintained the core platform's frontend using Vue 3, TypeScript, and Quasar, including negotiation interfaces with real-time updates via Server-Sent Events (SSE).
- Collaborated with the team on product workflows and UI decisions, simplifying user flows and refining features based on feedback from potential clients.
- Migrated pages from Vue 2 to Vue 3, proposed UI solutions, and fixed bugs.
- Added unit tests with Vitest and maintained shared UI components in Storybook.

JavaScript Frontend Engineer, N-iX
Jul 2022 – Oct 2023
Viking Raja Group – a multi-country B2B e-commerce platform built on SAP Hybris.

- Developed UI based on Figma designs; fixed production bugs in a large legacy codebase.
- Raised Jest test coverage from ~35% to 90%, reducing regression risk.
- Updated dependencies, optimized Gulp and Webpack builds, and reviewed frontend code.

JavaScript Engineer, Intellias
Mar 2021 – Jul 2022
CDW Corporation – an enterprise e-commerce platform.

- Redesigned UI for AEM-based blog and shopping microservices from Adobe XD designs.
- Developed reusable UI components and npm packages; added tests with Karma/Jasmine.

Frontend Developer, AB Soft
Oct 2020 – Feb 2021
RingCentral – a cloud communications and collaboration platform for businesses.

- Built reusable AEM components and migrated jQuery features to vanilla JavaScript.

Frontend Developer, Bambuk Design Studio
Mar 2020 – Oct 2020

- Built websites with complex layouts using WordPress or headless WordPress with Vue.js.
- Created the Ambiq website and implemented animations using GSAP, Three.js, and PixiJS.

Frontend Developer, Otakoyi
Apr 2018 – Mar 2020

- Worked on 3-4 client projects simultaneously across e-commerce and corporate websites.
- Built responsive custom layouts from Avocode and Figma designs.
- Developed WordPress themes, plugins, Elementor components, and Vue.js 2 features.

Freelance Frontend (HTML/CSS) Developer
Mar 2017 – Mar 2018

- Built and maintained small business websites using HTML, CSS, JavaScript, and jQuery.

Education

2017 – 2018 – Logos IT Academy, Web Development Courses
2012 – 2014 – Lviv Polytechnic National University, Software Engineering coursework
